

Elumind Centres for Brain Excellence - Marketing Plan

Company Overview

Business: Private outpatient mental health center specializing in brain optimization through neurotherapeutic modalities (Neurofeedback, TMS, QEEG Brain Mapping, Biofeedback, Photobiomodulation, Psychotherapy, Functional Medicine).

Locations: North Vancouver (HQ), Kelowna, Langley (British Columbia, Canada)

Founded: 2018 by Dr. Kourosh Edalati

Differentiator: Integrated, personalized, case-managed approach combining advanced neuroscience technologies with holistic therapies -- not just talk therapy or just medication, but a full-spectrum brain health solution.

Core Services: QEEG Brain Mapping, Neurofeedback, TMS, Biofeedback, Photobiomodulation, Psychotherapy (EMDR, CBT, Clinical Hypnosis), Life Coaching, Functional Medicine, Nutrition Counselling, Sleep Program, Pain Program, Smoking Cessation.

Conditions Treated: ADHD, Anxiety, Depression, PTSD, OCD, Autism, Chronic Pain, TBI, Sleep Disorders, Migraines, Memory/Dementia, Fibromyalgia, Post-Stroke.

Target Audiences

Primary Audiences

1. Adults with Treatment-Resistant Mental Health Conditions (Ages 30-55) - Have tried medication and/or traditional therapy without sufficient results - Searching for alternatives to medication-only approaches - Higher income, willing to pay out-of-pocket for private care - Search terms: "neurofeedback for anxiety," "TMS for depression," "alternatives to antidepressants," "brain mapping near me"

2. Parents of Children with ADHD/Autism (Ages 30-50) - Looking for non-medication alternatives for their children - Concerned about long-term medication side effects - Active in parent communities and forums - Search terms: "ADHD treatment without medication," "neurofeedback for ADHD kids," "autism therapy Vancouver"

3. High-Performing Professionals Seeking Brain Optimization (Ages 25-45) - Not necessarily diagnosed with a condition - Want peak cognitive performance, better sleep, stress management - Tech-savvy, wellness-oriented, open to biohacking - Search terms: "brain optimization," "neurofeedback for performance," "improve focus and concentration"

Secondary Audiences

4. Referring Clinicians (Psychiatrists, GPs, Psychologists) - Need confidence in clinical outcomes and credentials - Want a reliable referral partner for patients who need more than standard care

5. Corporate Wellness / HR Leaders - Looking for mental health benefits for employees - Interested in brain health programs as a perk

Marketing Objectives

Objective	Metric	Target
Increase new patient consultations	Free consultations booked/ month	+40% within 6 months
Grow organic search traffic	Monthly organic sessions	+60% within 12 months
Build email list for nurture	Subscribers	2,000 qualified leads in 12 months
Increase referral rate	% of patients from referrals	25% of new patients
Improve website conversion rate	Consultation booking rate	From baseline to 5%+

Channel Strategy

1. Search Engine Optimization (Local + Condition-Specific)

Priority: HIGH -- This is where high-intent patients are actively searching for solutions.

Local SEO - Optimize Google Business Profile for all 3 locations with complete information, photos of clinics, and regular posts - Ensure consistent NAP (Name, Address, Phone) across all directories - Collect and respond to Google Reviews (target 50+ reviews per location) - Build local citations on healthcare directories: RateMDs, Healthgrades, Psychology Today, Yelp, Yellow Pages Canada - Create individual location pages on elumind.com with unique content, driving directions, staff bios per location

Condition-Specific SEO Content Pillars

Build hub-and-spoke content clusters around the conditions Elumind treats:

Pillar 1: Anxiety Treatment

- /anxiety-treatment (hub)
- ├─ /blog/neurofeedback-for-anxiety
- ├─ /blog/tms-for-anxiety-what-to-expect
- ├─ /blog/anxiety-vs-normal-worry
- ├─ /blog/qeeg-brain-mapping-anxiety-patterns
- └─ /blog/medication-free-anxiety-treatment

Pillar 2: ADHD Treatment

- /adhd-treatment (hub)
- ├─ /blog/neurofeedback-for-adhd-children
- ├─ /blog/adult-adhd-non-medication-options
- ├─ /blog/qeeg-brain-mapping-adhd
- ├─ /blog/adhd-vs-normal-distraction
- └─ /blog/adhd-treatment-vancouver

Pillar 3: Depression Treatment

- /depression-treatment (hub)
- ├─ /blog/tms-for-treatment-resistant-depression
- ├─ /blog/neurofeedback-for-depression
- ├─ /blog/photobiomodulation-depression-research
- ├─ /blog/depression-treatment-without-medication
- └─ /blog/when-antidepressants-dont-work

Pillar 4: Brain Optimization & Performance

- /brain-optimization (hub)

- └─ /blog/what-is-neurofeedback
- └─ /blog/what-is-qqeg-brain-mapping
- └─ /blog/brain-training-for-peak-performance
- └─ /blog/improve-sleep-with-neurofeedback
- └─ /blog/biofeedback-for-stress-management

Pillar 5: PTSD & Trauma Recovery

- /ptsd-treatment (hub)
- └─ /blog/emdr-therapy-for-ptsd
- └─ /blog/neurofeedback-for-trauma
- └─ /blog/tms-for-ptsd
- └─ /blog/trauma-and-the-brain

Keyword Targets by Buyer Stage

Stage	Example Keywords	Content Type
Awareness	"what is neurofeedback," "brain mapping explained," "alternatives to antidepressants"	Educational blog posts, guides
Consideration	"neurofeedback vs medication," "TMS therapy reviews," "best ADHD treatment Vancouver"	Comparison content, case studies
Decision	"Elumind reviews," "neurofeedback cost Vancouver," "book brain mapping appointment"	Testimonials, pricing info, booking pages

Technical SEO Priorities - Implement LocalBusiness and MedicalClinic schema markup on all location and service pages - Ensure site loads in under 3 seconds on mobile - Add FAQ schema to condition pages (captures featured snippets) - Build internal links from blog content to service pages

2. Google Ads (Search + Local)

Priority: HIGH -- Capture high-intent searchers ready to book.

Campaign Structure

- Account
 - └─ Campaign 1: Condition-Specific Search
 - └─ Ad Group: Anxiety Treatment
 - └─ Ad Group: ADHD Treatment
 - └─ Ad Group: Depression / TMS

- | └─ Ad Group: PTSD / Trauma
- | └─ Ad Group: Sleep Disorders
- | └─ Campaign 2: Treatment-Specific Search
 - | └─ Ad Group: Neurofeedback
 - | └─ Ad Group: TMS Therapy
 - | └─ Ad Group: Brain Mapping / QEEG
 - | └─ Ad Group: Biofeedback
- | └─ Campaign 3: Brand
 - | └─ Ad Group: Elumind Brand Terms
- | └─ Campaign 4: Competitor
 - | └─ Ad Group: Competitor clinic names
- | └─ Campaign 5: Retargeting (Display)
 - | └─ Ad Set: Service page visitors (7-day)
 - | └─ Ad Set: Blog readers (30-day)

Sample Ad Copy (Problem-Agitate-Solve)

Headline 1: Anxiety Won't Go Away?
 Headline 2: Drug-Free Brain Therapy in Vancouver
 Headline 3: Free 15-Min Consultation
 Description: Traditional treatment not working? Elumind uses advanced neurofeedback & brain mapping to treat anxiety at its source.
 Book your free consultation today.

Budget Allocation Recommendation - Start with condition-specific search campaigns (highest intent) - Allocate 60% to search, 20% to retargeting, 10% to brand, 10% to testing - Target CPAs by tracking consultation bookings, not just clicks - Geo-target within 50km radius of each clinic location

3. Content Marketing & Thought Leadership

Priority: HIGH -- Build authority in a field where trust is everything.

Blog Content Calendar (Monthly) - 2 searchable blog posts (condition/treatment-focused, SEO-optimized) - 1 shareable blog post (patient story, research insight, or thought leadership) - 1 "explainer" post demystifying a treatment (e.g., "What Happens During a QEEG Brain Map?")

Video Content - Treatment explainer videos (2-3 min) for each core service: walk through what a neurofeedback session, TMS session, or brain mapping appointment looks like -

Patient testimonial videos (with consent) sharing their journey - Dr. Edalati thought leadership clips on brain health topics - Post natively on YouTube, Instagram Reels, and TikTok

Shareable Content Ideas - "The Roads, Cars, and Drivers" framework explained visually (Elumind's brain health analogy) - Original data: "What We've Learned from 1,000+ Brain Maps" (anonymized insights) - Myth-busting: "5 Things Most People Get Wrong About Neurofeedback" - Behind-the-scenes: "What a Day at Elumind Looks Like"

E-E-A-T Optimization (Critical for Health Content) - Author bios on every blog post with credentials (MD, FRCPC, PhD, etc.) - Link to published research where applicable - Include "Medically reviewed by Dr. [Name]" badges - Reference peer-reviewed studies in all clinical content

4. Email Marketing

Priority: MEDIUM -- Nurture leads who aren't ready to book immediately.

Lead Magnets to Build the List 1. "The Complete Guide to Brain Mapping: What It Reveals About Your Mental Health" (PDF) 2. "Is Neurofeedback Right for You? A Self-Assessment Checklist" 3. "5 Drug-Free Approaches to Treating [Anxiety/ADHD/Depression]" (condition-specific)

Email Sequences

Sequence 1: New Lead Nurture (Post-Download)

Email 1 (Immediate): Deliver lead magnet + introduce Elumind's approach
Email 2 (Day 2): "The science behind brain mapping" - educational value
Email 3 (Day 4): Patient success story relevant to their condition
Email 4 (Day 7): "What to expect at your first visit" - reduce friction
Email 5 (Day 10): Address common objections (cost, time, "does it really work?")
Email 6 (Day 14): Direct CTA - book a free 15-minute consultation

Sequence 2: Post-Consultation (Didn't Book Treatment)

Email 1 (Day 1): Thank you + summary of what was discussed
Email 2 (Day 3): Relevant case study / testimonial
Email 3 (Day 7): "Questions we commonly hear after consultations" (FAQ)
Email 4 (Day 14): Gentle follow-up with booking link

Sequence 3: Monthly Newsletter - New research/insights in brain health - Patient spotlight (with consent) - Clinic news and new services - Helpful tips (sleep hygiene, stress management, brain exercises)

5. Social Media

Priority: MEDIUM -- Build awareness and trust; not a primary conversion channel.

Platform Focus - Instagram: Primary social channel. Visual content of clinic, team, treatment rooms. Reels explaining treatments. Patient stories (with consent). Brain health tips. - **YouTube:** Long-form treatment explainers, patient journeys, Dr. Edalati interviews. Strong SEO value. - **LinkedIn:** Clinician referral network. Share research, thought leadership. Target referring healthcare professionals. - **Facebook:** Local community engagement. Parent groups (ADHD/autism). Event promotion.

Content Mix - 40% educational (brain health facts, treatment explainers, myth-busting) - 30% social proof (patient stories, reviews, awards, clinic milestones) - 20% behind-the-scenes (team introductions, clinic tours, day-in-the-life) - 10% direct promotion (consultation offers, new service announcements)

6. Referral Program

Priority: MEDIUM -- High-trust industry where word-of-mouth is powerful.

Patient Referral Program - Incentive: Double-sided -- referring patient receives a credit toward a future session, referred patient gets a discount on their initial assessment - **Trigger moments:** After completing a treatment milestone, after a positive outcome check-in, after leaving a review - **Mechanism:** Personalized referral link or simple referral card (physical + digital) - **Goal:** 25% of new patients from referrals within 12 months

Clinician Referral Program - Build a formal referral network with local GPs, psychiatrists, psychologists, and pediatricians - Provide referring clinicians with outcome data and clinical summaries (with patient consent) - Host quarterly "Lunch and Learn" sessions for referral partners to educate them on neurofeedback, TMS, and brain mapping - Create a dedicated clinician referral portal on the website (elumind.com already has this at /clinicians-and-providers/)

7. Website Conversion Optimization

Priority: HIGH -- The website is the primary conversion point.

Homepage CRO - Headline should communicate the core value proposition immediately: what Elumind does, for whom, and why it's different - Primary CTA above the fold: "Book Your Free 15-Minute Consultation" - Add trust signals near the CTA: Healthcare Business Review award badge, number of patients treated, number of brain maps completed - Include a "How It Works" section: (1) Book a free consultation, (2) Get your personalized brain map, (3) Start your treatment plan - Add condition-specific entry points: "I'm looking for help with: [Anxiety] [ADHD] [Depression] [Sleep] [Other]" -- routes visitors to relevant service pages

Service Pages - Each condition and treatment should have a dedicated landing page - Structure: Problem description (in patient language) -> How Elumind's approach works -> What to expect -> Outcomes/evidence -> Patient testimonials -> CTA to book consultation - Add FAQ sections with schema markup

Booking Flow - Minimize friction: reduce form fields to name, email, phone, condition of interest, preferred location - Offer online scheduling tool (Calendly, Acuity, or similar) for self-service booking - Add live chat or chatbot for immediate questions during business hours

90-Day Launch Priorities

Month 1: Foundation

- [] Audit and optimize Google Business Profile for all 3 locations
- [] Implement LocalBusiness + MedicalClinic schema markup on the website
- [] Set up Google Ads campaigns (condition-specific search + brand)
- [] Create and publish 2 hub pages (Anxiety Treatment, ADHD Treatment)
- [] Set up email marketing platform and create first lead magnet
- [] Install conversion tracking (Google Analytics 4 + Google Ads conversion tags)
- [] Optimize homepage with clear value proposition, CTA, and trust signals

Month 2: Content & Nurture

- [] Publish 4 blog posts (2 per content pillar)
- [] Launch lead nurture email sequence

- ☐ Create 2 treatment explainer videos (Neurofeedback + Brain Mapping)
- ☐ Begin Instagram content calendar (3-4 posts/week)
- ☐ Launch retargeting campaign for website visitors
- ☐ Set up and optimize booking flow (reduce friction)
- ☐ Begin collecting and responding to Google Reviews

Month 3: Scale & Optimize

- ☐ Publish 2 more hub pages (Depression Treatment, Brain Optimization)
- ☐ Launch patient referral program
- ☐ Host first "Lunch and Learn" for referring clinicians
- ☐ Analyze Google Ads performance, cut underperformers, scale winners
- ☐ Publish first patient success story (video + written)
- ☐ Launch monthly newsletter
- ☐ Review all metrics against targets, adjust strategy

Budget Allocation (Recommended Monthly)

Channel	% of Budget	Activities
Google Ads	40%	Search campaigns, retargeting, local ads
Content Production	25%	Blog writing, video production, graphic design
SEO	15%	Technical optimization, link building, local SEO
Email Marketing	10%	Platform, lead magnets, sequence development
Social Media	10%	Content creation, community management

Note: Exact dollar amounts should be determined based on Elumind's total marketing budget. For a private healthcare clinic with 3 locations, a monthly marketing budget of \$8,000-\$15,000 would be a reasonable starting point to execute this plan effectively.

Key Performance Indicators (KPIs)

Leading Indicators (Weekly/Monthly Tracking)

- Website traffic (organic, paid, direct, referral)
- Google Ads CTR, CPC, and conversion rate
- Consultation bookings by source
- Email open rate, click rate, and list growth
- Google Business Profile views and actions
- Social media engagement rate

Lagging Indicators (Monthly/Quarterly)

- New patients per month (by location)
- Cost per consultation booking (by channel)
- Patient acquisition cost (fully loaded)
- Referral rate (% of new patients from referrals)
- Revenue per patient (average treatment plan value)
- Patient retention and treatment completion rate

Competitive Positioning

Elumind's marketing should consistently reinforce these differentiators:

1. **Integrated approach:** Not just one treatment modality -- a comprehensive, personalized plan combining neuroscience technology with holistic therapies
2. **Brain-first diagnosis:** Starts with objective QEEG brain mapping, not just symptom checklists
3. **Proven technology:** Clinically validated, peer-reviewed treatments (not experimental or fringe)
4. **Recognized excellence:** "Top Mental Health Services Provider" -- Healthcare Business Review
5. **Personalized care:** Case-managed treatment plans tailored to each individual's brain patterns

6. **Drug-free options:** Alternatives to medication-only approaches (a major differentiator for many patients)
-

Risk Considerations

- **Healthcare advertising regulations:** All ad copy and content must comply with Canadian healthcare advertising standards. Avoid making claims that overstate efficacy. Use language like "may help with" rather than "cures" or "treats."
 - **Patient privacy:** All testimonials, case studies, and patient stories require explicit written consent. Anonymize clinical data used in content.
 - **Review management:** Negative reviews require prompt, professional, PHIPA-compliant responses. Never disclose patient information in review responses.
 - **Content accuracy:** All clinical content should be reviewed by a licensed clinician before publication to ensure medical accuracy.
-

This marketing plan was built using frameworks from the [Marketing Skills](#) repository, including content-strategy, marketing-ideas, paid-ads, seo-audit, page-cro, email-sequence, and referral-program skills.
